Maria Polusidiropoulou m.polusidiropoulou@email.com Random Number: +30 6976543210 Location: [University Location]

Professional Profile: A dedicated and enthusiastic individual with a strong academic background in Computer Science and a keen interest in artificial intelligence and machine learning. Proven ability to conduct in-depth research and analyze complex data sets to drive data-driven insights. Possesses excellent problem-solving skills and a passion for staying up-to-date with the latest advancements in the field. Demonstrates effective communication and team collaboration abilities, contributing to successful project outcomes. Committed to applying machine learning techniques to address real-world challenges and improve various aspects of society.

Core Skills: • Machine Learning Algorithms • Deep Learning • Natural Language Processing • Data Analysis • Statistical Modeling • Python Programming • Research Methodology • Data Visualization • Cloud Computing • Software Development

Education: PhD in Computer Science | [University Name] | [Start Date] - [End Date] Dissertation: "Advancing Recommender Systems with Hybrid Collaborative Filtering Techniques" Courses: Advanced Machine Learning, Neural Networks and Deep Learning, Big Data Analytics, Text Mining, and Algorithm Design.

MSc in Artificial Intelligence | [University Name] | [Start Date] - [End Date] Thesis: "Applications of Natural Language Processing in Sentiment Analysis" Courses: Fundamentals of Machine Learning, Data Mining, Computer Vision, Reinforcement Learning, and Data Ethics.

BSc in Computer Science | [University Name] | [Start Date] - [End Date] Courses: Programming Fundamentals, Algorithms and Data Structures, Web Development, Database Management, and Software Engineering.

Publications:

1. "Enhancing Fraud Detection in Online Transactions using Machine Learning Algorithms," Journal of Cybersecurity and Data Privacy, Vol. 15, Issue 3, 2023.
2. "Predicting Customer Churn in Telecommunication Services with Ensemble Learning," IEEE Transactions on Big Data, Vol. 22, Issue 1, 2022.
3. "A Comprehensive Review of Machine Learning Techniques for Image Classification," International Conference on Computer Vision (ICCV), 2021.
4. "Sentiment Analysis of Social Media Data for Brand Reputation Management," Social Media Analytics Conference, 2020.
5. "Anomaly Detection in Internet of Things (IoT) Devices using Unsupervised Learning," ACM Transactions on Internet of Things, Vol. 12, Issue 4, 2019.

Research Experience: Research Assistant | [University/Institute Name] | [Start Date] - [End Date]

- Assisted in conducting research on natural language processing and sentiment analysis.

- Contributed to the development of a machine learning-based chatbot for customer support.

Teaching Experience: Teaching Assistant | [University Name] | [Start Date] - [End Date]

- Assisted in teaching undergraduate courses in computer programming and data structures.

Project Experience: Machine Learning Project | [Project Title] | [Start Date] - [End Date]

- Led a team in implementing a deep learning model for image classification, achieving 95% accuracy on the test set.

Skills Projects:

- Developed a sentiment analysis application for analyzing social media data using Python and Natural Language Processing techniques.
- Created a web-based data visualization dashboard to explore trends in a large dataset using Tableau.
